

PCM320 Pressure Transmitter

Features

- Compact structure, exquisite appearance
- Digital circuit processing
- High precision, high stability
- Strong anti-interference, good long-term stability
- Small size, light weight, easy installation and use
- Wide measuring range, can measure absolute pressure, gauge pressure and sealed gauge pressure
- Multiple process connection and electrical connection options
- Suitable for mass production, economic and reliable

Applications

- Hydraulic and pneumatic equipment
- Chemicals and Chemical Industry
- Compressor
- Inkjet printer

Notes:

- 1 Do not touch the diaphragm with hard objects, which may cause damage to the diaphragm.
- 2 Please read the Instruction Manual of the product carefully before installation and check the relevant information of the product.
- 3 Strictly follow the wiring method for wiring, otherwise it may cause product damage or other potential faults.
- 4 Misuse of the product may cause danger or personal injury.

Product overview

PCM320 pressure transmitter is designed with a compact integrated stainless steel structure with a built-in digital processing circuit that converts the millivolt signal of sensor into standard voltage or current signal output. The structures and output forms are various. PCM320 is featured with small size, light weight, easy installation and use, and stable performance. It is widely used in industrial automation equipment and has good adaptability to various complicated environments.

Notes:

- 1 Do not misuse documentation.
- 2 The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- 3 Complete installation, operation, and maintenance information is provided in the instructions of the product.
- 4 Misuse of the product may cause danger or personal injury.

| Performance parameters | |

Application of damper

Application

Cavitation, liquid hammer and pressure peak may occur in air or hydraulic systems with varying flow rates, such as the rapid closing of valve or the start and stop of pump. Even at relatively low operating pressures, these problems may occur at the entrance and exit.

Media condition

In the liquid containing particles, nozzle clogging may occur. The vertical mounting of pressure transmitter minimizes the risk of clogging because the flow of fluid happens in initial start only, the volume of the rear of the nozzle is fixed and the nozzle has a relatively large aperture (1.2 mm).

The effect of medium viscosity on response time is small. Even if the viscosity reaches 100 CST, the response time will not exceed 4 ms.

| Pressure port | | | |
|--------------------|---|--------------------|----------------------------|
| Thread code | C3: G1/4 | C4: M14×1.5 | C5: NPT1/4, Z1/4 |

How to order

Example: PCM320-35kGB1C3J3

Refer to product model PCM320, with pressure range 0~35kPa, pressure reference gauge pressure, output signal 4~20mA, pressure port G1/4, electrical connection cable outlet.

5

Ordering tips:

Ensure compatibility between measured media and contacting part of product when placing an order.
